

IMPORTANT NOTICE

- Check all wheel nuts for correct tension after the vehicle has travelled 100km. Additionally check the temperature of the hubs is not excessive.
- It is vital that the trailer has a 3000km service check as described below. Please ensure this service is completed either at Domett Truck & Trailer Ltd or by your own suitably qualified technician. In most circumstance's this will be the first part of your servicing for this vehicle and will need to be maintained according to the details supplied in your service manual.
- Your new trailer's owner manual is now on the internet on our web site www.domett-trailers.co.nz Click on trailer speciation section, then enter the chassis number (last 3 digits of VIN) and your e-mail address in boxes provided. Then click on the icon required for information search.

FREE 3000km SERVICE CHECK

All new trailers bought from Domett Truck and Trailer Limited come entitled to one service check free of charge after the break in period. The service will cover the following;

- Check oil in hubs
- Correct tension on all suspension bolts
- Correct tension wheel nuts
- Adjust brakes and check
- Check wheel bearing adjustment
- Check ballrace bolts
- Grease all points

The above process will take approximately 5 hours.

THANK YOU FOR YOUR VALUED BUSINESS.
